Follow the exact 3-step procedure found under TO SET POWER LEVEL on page 11. Estimate defrosting time and touch POWER LEVEL pad eight times for 30% power.For either raw or previously cooked frozen food the rule of thumb is approximately 4 minutes per pound. For example, defrost 4 minutes for 1 pound of frozen spaghetti sauce.Always stop the oven periodically to remove or separate the portions that are defrosted. If food is not defrosted at the end of the estimated defrosting time, program the oven in 1 minute increments on POWER LEVEL 30% until totally defrosted.When using plastic containers from the freezer, defrost only long enough to remove from the plastic in order to place in a microwave-safe dish.Page 113MiCROWave DraWer COOKingvegetables CHARTFOOD AMOUNT PROCEDURE1 Quick Fresh Vegetables Broccoli Brussels sprouts Cabbage Cauliflower (overets) Cauliower (whole) Spinach Zucchini Baked apples.25 - 2.0 lb.25 - 2.0 lb.25 - 2.0 lb. 1 med.25 - 1.0 lb.25 - 2.0 lb. 2 - 4 med.Wash and place in casserole. The sensor adjusts the cooking times and power levels for various foods and quantities.using sensOr settings: 1 After the Microwave Drawer is plugged in, wait 2 minutes before using any sensor setting. 2 Be sure the exterior of the cooking container and the interior of the Microwave Drawer are dry. Wipe off any moisture with a dry cloth or paper towel. 3 The sensor works with foods at normal storage temperature. For example, popcorn will be at room temperature. 4 Any sensor selection can be programmed with More or Less Time Adjustment. See page 18. 5 More or less food than the quantity listed in the charts should be cooked following the guidelines in any microwave cookbook. 6 During the rst part of sensor use, the food name will appear on the display. Do not open the Microwave Drawer or touch STOP/CLEAR during this part of the cycle. The measurement of vapor will be interrupted. If this occurs, an error message will appear. To continue cooking, touch the STOP/CLEAR pad and cook manually. When the sensor detects the vapor emitted from the food, the remainder of cooking/reheating time will appear. The Microwave Drawer may be opened when the remaining time appears on the display. At this time, you may stir or season food, as desired. 7 Except for Popcorn, if the sensor does not detect vapor properly when cooking other foods, ERROR will be displayed, and the microwave will turn off. 8 Check food temperature after cooking. If additional time is needed, continue to cook manually. 9 Each food has a cooking hint.
